**NOTICE OF PUBLIC HEARING**

concerning

**RENEWAL OF WASTE DISCHARGE REQUIREMENTS  
NPDES PERMIT NO. CA0081787  
FOR  
SPX CORPORATION  
SPX MARLEY COOLING TECHNOLOGIES  
SAN JOAQUIN COUNTY**

SPX Corporation (Discharger) is the owner and operator of SPX Marley Cooling Technologies (Facility), a groundwater cleanup site located at 200 North Wagner Avenue, Stockton, California. The Facility consists of a groundwater extraction and treatment system intended to address a hexavalent chromium plume in the groundwater, which is the result of a former wood preservation operation at the site. The Discharger is authorized to discharge up to 0.94 million gallons per day (MGD) of treated effluent to the Stockton Diverting Canal, which empties into the Calaveras River, a water of the United States.

The Facility is currently regulated by Waste Discharge Requirements Order (WDRs) R5-2014-0013, issued by the Central Valley Regional Water Quality Control Board (Central Valley Water Board) on 7 February 2014. An Order is proposed to renew the NPDES permit. The proposed Order includes revised effluent limitations for hexavalent chromium and copper. In addition, the effluent limits for chromium (total) have been removed because the discharge does not have reasonable potential to cause or contribute to an exceedance of the applicable water quality objectives in the Stockton Diverting Canal.

A public hearing concerning this matter will be held during the Central Valley Water Board meeting scheduled for:

DATE: 7/8 February 2019  
TIME: 8:30 a.m.  
PLACE: Central Valley Regional Water Quality Control Board Room
